AMENDMENT TO CLAIMS

- 1 (currently amended). In a mini-van having a rear opening, a rear door closing the rear opening, and an extendible ramp for providing access to the rear of the minivan, the improvement comprising:
- a bumper divided into at least three sections, wherein [[the]] <u>a</u> central section is coupled to one of the remaining sections by a hinge that enables the central section to swing like a gate to provide access through the bumper to the rear opening.
- 2 (original). The minious as set forth in claim 1 wherein said minious includes a drop floor extending to said rear opening and said central section includes a cover section attached to the lower portion of said central section for enclosing said drop floor.
- 3. (original) The miniman as set forth in claim 1 wherein said central section is wider than said ramp.
- 4 (original). The minimum as set forth in claim 1 wherein said central section includes a latch that secures the rear door in a closed position.
- 5 (original). The minivan as set forth in claim 1 wherein said central section is coupled to one of the remaining sections by a four bar hinge.
- 6 (original). The minimum as set forth in claim 5 wherein said four bar hinge causes said central section to move rearwardly from a closed position and then to rotate about said hinge.
- 7 (original). In a mini-van having a rear opening, a rear door closing the rear opening, and an extendible ramp for providing access to the rear of the minivan, the improvement comprising:
- a gate adjacent the rear opening, said gate pivoting about a substantially vertical axis to provide access to the rear opening.

- 8 (original). The minivan as set forth in claim 7 wherein said gate is coupled to said minivan by a four bar hinge.
- 9 (original). The minioun as set forth in claim 8 wherein said four bar hinge causes said gate to translate and then rotate as the gate is opened and to rotate and then translate as the gate is closed.
- 10 (original). The minivan as set forth in claim 7 wherein said gate includes a latch that attaches the rear door to the gate.
